SUDDEN DEATH.

The Venerable Mrs. John Paul Fatally Stricken About 10 O'clock Last Evening.

Mrs. John Paul, residing near the first tollgate on the Lexington pike, was seated last evening in the family circle, with no indication of impending death.

About 10 o'clock she retired and soon after was seized with suffocating spells.

The family was aroused and her son-in-law dispatched for Dr. Reed, but when he got there she was dead.

Heart disease was evidently the cause. Mrs. Paul was 73 years of age. Besides her husband she leaves five children, two sons and three daughters—Mrs. George W. Adair, Mrs. Charles Newdigate and Miss Mary Paul all of this vicinity, and Hon. J. J. Paul of Somerset and William Paul of Sharpburg.

NOW'S THE TIME!

This Is the Best Time to Build Railway Lines.

OPINIONS GIVEN BY EXPERTS.

Anent the proposition of Colonel Albert E. Boone to build a railway line from the Lakes to the Atlantic Ocean via Maysville, a recent issue of The Pittsburgh Times thus speaks of the revival of railway building:

"A current item speaks of a new railway that is contemplated from Chicago to the Gulf of Mexico by way of Kansas City. While this particular project may, for the present, amount to nothing, there is reason to believe that a number of similar ones are only awaiting a return of prosperous and settled conditions to get under way. For a number of years railroad construction has been at a low ebb owing partly to overbuilding in the past and to financial conditions, but the time has come when the country has grown up to and beyond its railway facilities in many sections, and when enterprise is ready to add largely to our already large mileage.

"Since the last era of railway building methods have been much cheapened and improved, so that it is possible to venture with a railway into many localities where such an enterprise was prohibited under past conditions. A technical journal recently collected statistics showing that there were, for the present season, 17,000 miles of railway either under construction or projected. This will doubtless be largely added to if conditions improve.

"Like the line referred to in the beginning of this article, a good deal of the railway construction of the near future will be upon lines running North and South. All of the great trunk lines of the present, with few exceptions, run East and West. We have been expending nearly all of our energies in reaching out to the Pacific and to penetrating the new commonwealths of the Rocky Mountain region, while neglecting the older and more important field in the South. This neglect is bound soon to be remedied, and the furnishing of the South with needed railway facilities will add much to the activity when the revival comes."

Eyesight

Is of such great value that one ought to take more than ordinary precautions to guard against every possible trouble.

If you have even a remote suspicion that there is any trouble with your eyes it will be for your own best interests to have your vision tested and trouble, if any, removed.

Very simple troubles may develop serious results if not properly treated.

Ordinary failing eyesight receives our most careful attention, both as to glasses and frames.

It's just as important to have the right frame as the right glass, and from our large stock we can give you the correct thing in either Gold, Silver or Steel.

We make no charge for examinations, and if yours is a case requiring the services of an oculist we will frankly tell you so.
